ANALEC successfully implements its ResearchWise™ Suite at DBS Vickers

Date: 20th January 2006

DBS Vickers Securities, the investment banking arm of one of the largest financial services groups in Asia – DBS Bank – went “live” with ANALEC’s integrated ResearchWise™ suite (an enterprise class analytics and workflow solution) within its investment research and sales & trading division.

Commenting on the implementation experience, Timothy Wong, Regional Head of Research at DBS Vickers, says, “The ANALEC team was very dedicated to the task of implementation. They also demonstrated a high degree of flexibility in working with us”.

“We view the successful roll-out of our integrated ResearchWise suite at DBS Vickers as a significant milestone in our firm’s development and remain excited about our long-term growth prospects. Our ability to win business in a competitive market place vindicates the ‘next generation’ capabilities of our product suite.” says Indy Sarker, CEO of Analec Infotech Private Limited.

ANALEC’s implementation team, consisting of business consultants and IT professionals, worked to a time-bound delivery programme over 4 months to deliver the solution at the DBS Vickers end on schedule. It involved customizing the look-and-feel of all external interfaces to DBS Vickers’ requirements and branding needs; customizing the automatic and seamless market feed service into ResearchWise in line with DBS Vickers’ choice of data provider; setting up and customisation a series of content retrieval templates in Microsoft Excel and Word; aiding the re-classification of sectors and their stock constituents; setting up the database with the appropriate user access rights and relevant user-information; implementing a customized and versatile compliance and disclosure management system within the investment bank; and customizing a whole range of investment research specific input parameters among other capabilities.

ANALEC presently remains closely engaged with DBS Vickers to ensure training (administrators and users alike) and user-familiarity issues on the platform are appropriately transferred to the DBS Vickers end, across its various offices in the region.

End

About ANALEC:

ANALEC is a specialised service provider to the investment banking and investment research industry. It leverages its deep domain knowledge of the investment research and investment banking industry to develop and deploy enterprise level software-enabled business process solutions, addressing very specific organisational issues and challenges within investment research and client servicing functions. Under its remote delivery model, ANALEC offers its customers the option to remotely manage and deliver a range of services. Founded in June 2003, ANALEC brings together over 50 years of leading expertise in investment research, investment banking and software development and deployment.

Headquartered out of Singapore, ANALEC has a delivery centre in India and a sales office in the United States.
